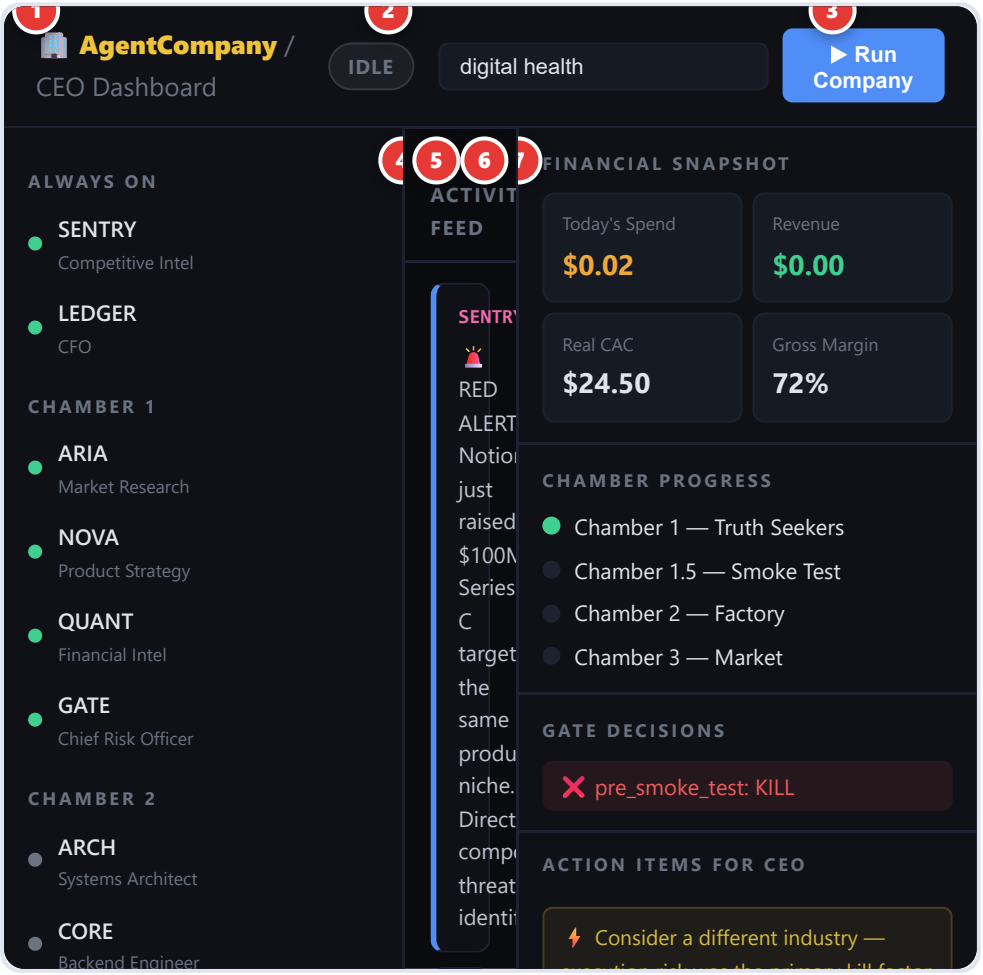
🏢 AgentCompany

Visual Dashboard Guide

A visual walkthrough of every element on the CEO Dashboard

The CEO Dashboard — Full View (http://localhost:8000)

This is exactly what you see when you open the dashboard. It has four zones: the **Top Bar**, the **Left Agent Roster**, the **Centre Activity Feed**, and the **Right CEO Panel**.



1 Logo
Always visible. Purely informational.

2 Status Badge
IDLE (gray) · RUNNING (blue pulse) · COMPLETE (green) · KILLED (red)

3 Run Form
Type your industry + click ▶ Run Company to start

4 Agent Roster
Green dot = done · Blue pulse = running · Gray = idle

5 Activity Feed
Real-time cards from every agent — colour-coded by event type

6 Clear Button
Wipes the visual log only — Notion is unaffected

7 CEO Panel
KPIs · Chamber progress · Gate decisions · Action items

Event Card Types — Activity Feed

Every message in the centre feed is an event card. The **coloured left border** tells you what type of event it is at a glance.

ARIA chamber1 09:14:38
🔵 Blue border = **agent_start** — agent has begun working on their task

NOVA chamber1 09:15:11
🟢 Green border = **agent_output** — agent finished and produced a result

GATE chamber1 09:16:44
✅ Green border + GO = **gate_decision PASS** — run continues to next chamber

GATE chamber1 09:16:44
❌ Red border + KILL = **gate_decision KILL** — run stops here, idea rejected

GATE chamber1 09:16:44
⚠️ Amber border = **gate_decision PIVOT** — idea needs adjustment before proceeding

LEDGER chamber1 09:17:02
⚡ Gold border = **ceo_action** — a specific recommendation for you as CEO

Each card also shows the **agent name** (colour-coded — every agent has a unique colour), the **chamber** it belongs to, and the **timestamp**.

Status Badge — The Four States

The badge in the top bar changes colour and text as the run progresses.

IDLE	RUNNING	COMPLETE	KILLED	ERROR
Ready to run	Agents working	All chambers passed	GATE issued KILL	Python error

Agent Dots — What Each Colour Means

Every agent in the left roster has a small dot showing their real-time state.

- Gray — Idle, not yet called
- Blue — Currently running / thinking
- Green — Finished successfully
- Red — Error occurred
- Amber — Blocked / waiting

Right Panel — CEO Panel Breakdown

The right panel has four stacked sections. Here's what each one shows and when it updates.

① FINANCIAL SNAPSHOT

Today's Spend	Revenue
$0.02	$0.00
Real CAC	**Gross Margin**
$24.50	72%

Updated live as QUANT and LEDGER report data. Shows — until agent completes.

② CHAMBER PROGRESS

- Ch1 Truth Seekers ✓
- Ch1.5 Smoke Test
- Ch2 Factory
- Ch2.5 Soft Launch
- Ch3 Market

Dark = pending · Blue pulse = active · Green = passed · Red = failed

③ GATE DECISIONS

④ ACTION ITEMS FOR CEO

✅ pre_smoke_test: GO

❌ smoke_test: KILL

Appears after each GATE checkpoint. GO = continue · KILL = stop · PIVOT = adjust

⚡ Try a narrower niche — execution risk was the kill factor.

⚡ QUANT used most tokens. Switch to deepseek-chat to save cost.

Specific recommendations from LEDGER. Also saved in Notion CEO Daily Report.

How to Start a Run — Step by Step

1 **Start the server in a terminal**

```
cd E:\AgentCompany\AgentCompany
venv\Scripts\python.exe -m uvicorn api.server:app --host 0.0.0.0 --port 8000 --reload
```

⚠️ Keep this terminal open — the server must stay running.

2 **Open the dashboard in your browser**

```
http://localhost:8000
```

3 **Type your industry and click Run Company**

productivity tools ▶ Run Company

The button grays out and shows "⏳ Running..." — watch the feed for live agent activity.

Reading a GATE Decision Card

When GATE finishes, a card appears in the feed with the full score breakdown. Here's how to read it:

GATE chamber1 09:16:44

❌ **KILL** — Composite score: **5.6 / 10.0** (threshold: 6.0)

Market Opportunity: 7.0 · Competitive Edge: 4.5 · Financial Viability: 4.5 · Execution Risk: 5.5 · Product-Market Fit: 7.0

Primary kill factor: Execution Risk (build timeline 8–12 months exceeds 6-month runway constraint). Financial Viability penalised by low gross margin projection (51%).

Market Opp.	Comp. Edge	Fin. Viability	Exec. Risk	PMF

7.0	4.5	4.5	5.5	7.0
25%	20%	25%	20%	10%
